

# Andrew Abdulaziz

## WEB DEVELOPER

Canadian Citizen | andrewabdulaziz32@gmail.com

[LinkedIn](#) | [Website](#) | [GitHub](#)

## SUMMARY

Full stack engineer with a strong foundation in building scalable applications in HTML, CSS, JavaScript, React and more. Proficient in API development and database integration. Familiar with modern development practices, CI/CD pipelines, Software Development Life Cycle, Agile/Scrum methodology, and software security. Passionate about developing robust, production-ready software projects.

## EXPERIENCE

August 2022 - Current

### **Cashier, *Deja Vu Discs***

- Sold and purchased used DVDs, CDs, Blu-Rays, video games, and vinyl. Thoroughly checked through each item customers would sell us to ensure they are in good condition and fit to sell.
- Worked opening and closing shifts. Followed strict routine and carefully carried out important closing and opening duties.

May 2024 - Current

### **Jr. Software Developer, *Search Engine People***

- Created Looker Studio data reports for several businesses.
- Established familiarity with creating a custom website with WordPress, HTML, CSS, JavaScript, and some PHP.
- Strengthened knowledge in digital marketing and analytics. Established greater understanding in Google Analytics 4, Google Search Console, and Google Ads. Implemented GA4, Google Ads, and Search Console tracking code into websites.

## EDUCATION

### **Bachelor's in Computer Science, Trent University (2022-2026)**

Related coursework: Programming for Computing Science, Software Design & Modelling, Data Structures & Algorithms, Database Management Systems, Discrete Structures, Systems Programming, Software Specs & Development, Web Development 1: Front End, Web Development 2: Backend, Multimedia & Design, Computer Organization, Systems Analysis & Design, Computer Information & Security.

## PROJECTS

### [My Website](#) | HTML, CSS, JavaScript, JQuery

- Portfolio project showcasing work experience, projects, and skills.
- Portfolio makes good use of visual transitions, clean UI, semantic HTML, and responsive design

### [The Art Zone](#) | HTML, CSS, JavaScript

- Website showcasing art projects by talented drawers
- Responsive design, easy to navigate UI, semantic HTML

### [NBA Power Rankings](#) | HTML, CSS, JavaScript, React

- Website where you can develop power rankings of NBA teams by comparing each NBA team side-by-side with one another
- Complex JavaScript algorithm to track and sort ranking to make reduce the log time of ranking from  $O(N^2)$  to  $O(N \log n)$
- Effective use of React useState hooks, components, and props
- Responsive design and option to copy ranking to clipboard

### [Country Land Mass Calculator](#) | HTML, CSS, JavaScript, React

- Website where you can find the sum of different countries' land mass

- **Effective use of React useState hooks, components, props, and React routing**
- **Responsive design, easy to navigate UI, and guide properly explaining how site works**

## **SKILLS**

Languages: JavaScript, TypeScript, C#, C, Python, Java, PHP, Bash

Web Development : HTML, CSS, React, Node.js, Express, MySQL, MongoDB

Security & Testing: Web Development Best Practices, CI/CD pipelines, SemGrep

Tools & Platforms: Git/Github, Postman, REST APIs, Software Development Life Cycle, UML diagrams
